To us, the word trust has multiple meanings. Most obvious, of course, is the trust offered by our safety, security and storage solutions. People depend on our products to protect their property and ensure their personal safety, so earning and keeping our customers’ trust is imperative.

Trust, however, always starts internally; on the floor, in our office, between departments and colleagues. Here at Folding Guard®, trust leads us to accomplish great things.
Folding Guard® was founded more than half a century ago in Chicago and has been a fixture of the industrial community ever since. For decades, we have stayed true to our mission: to continuously improve our products and processes to make the right level of safety, security and storage available to each and every customer.

Our products may be our pride and joy, but our customers are our number one priority. Caring for people has become a natural part of our DNA through decades of dedicated work. Businesses of all kinds, in every part of the US, are using Folding Guard® solutions to support the welfare of employees and to ensure that everyday work runs as smoothly as possible. That’s why we believe there is no time to waste when it comes to making workplaces safe and secure.

We take pride in delivering on time and challenging ourselves to exceed the expectations of our customers at every step. In our plant, we’ve found that a mix of human skills and modern technology is the key to success. This results in efficient production, a high level of precision, and quality control down to the smallest details.

Since 2016, Folding Guard® has been a part of the Troax Group — one of the international leaders in industrial safety. Troax has been in this business as long as we have — and we have a common view of the future: there are always better solutions in safety, security and storage waiting out there. By working together and letting trust be our guiding light, we will find them.
It took a special kind of commitment to make this happen. At the dawn of the 20th century, Chicago was recognized as one of the world’s five largest cities. Less than one hundred years earlier, settlement in the area had consisted of little more than a trading post on the river bank.

Steel played an essential role in this urban growth of unprecedented proportions. Steelmaking had just been rationalized, and the innovative use of steel frames for buildings helped the city of Chicago to aim ever higher—eventually creating the world’s first skyscrapers.

Folding Guard® was founded in 1962, when Chicago’s steel industry was still at its peak. In our hands, steel would once again show its versatility and usefulness—first as sturdy folding gates, then as protective wire products. Since then we have survived and thrived through five decades of more complex business structures, tougher competition and higher demands. No challenge has been too tough to overcome.

Today, steel continues to be the strong framework for Folding Guard®. But the commitment, the pride and the trust is all about people—our customers, who return to us year after year for all their safety, security and storage needs, and our dedicated employees, who take pride in their work each and every day.
Real people are essential to the production of all safety, security and storage solutions from Folding Guard®. Human hands, eyes and minds can never be fully replaced by machines and automation in our business. The reliability expected from the end result is just too important.
Our machine guarding systems help prevent accidents around robots and automated equipment in industrial environments.
PROTECT YOUR WORKERS FROM HARMFUL ACCIDENTS AND COSTLY FINES

- **STRUCTURAL INTEGRITY**
  Our framed welded mesh that bolts into our posts gives Saf-T-Fence® superior strength and stability.
- **MODULAR SYSTEM**
  The Saf-T-Fence® system consists of standard panels available in a variety of widths and heights.
- **IN STOCK**
  We keep a large stock of our standard components in-house to ensure quick shipping for your urgent needs.

Maintaining the safety of your employees around machinery is paramount to the success of your business. Saf-T-Fence® is designed to protect your workers from harmful accidents and costly fines while also promoting productivity and reducing downtime.

Our modular system consists of three system heights, multiple styles of doors and over 30 pre-fabricated wire mesh panel sizes. All pieces assemble and install precisely and easily. You’ll enjoy worker safety, less downtime and compliance with federal safety regulations when you use Saf-T-Fence® to fulfill all of your machine guarding needs.

**SAF-T-FENCE® MACHINE GUARDING**

800-622-2214 | 5858 West 73rd Street | Bedford Park, IL 60638 | sales@foldingguard.com | www.foldingguard.com
**THE MACHINE GUARDING SYSTEM
THAT BLENDS FUNCTION, FLEXIBILITY AND COST-FRIENDLINESS**

- **STURDY SYSTEM**
  With 90 degree bends at the top and bottom of all panels, the rigidity of this system is unparalleled compared with other frameless systems.

- **UNSURPASSED ADJUSTABILITY**
  Panels can easily be adapted before delivery at each intersection in its tight 1 ¼ " grid pattern, compared with other frameless systems.

- **EASILY COMBINED WITH OUR SAF-T-FENCE® SYSTEM**
  Can be used where risk of impact is low and in higher-risk sections.

Our Frameless Machine Guarding system is an attractive guarding solution that provides great visibility around each machine. Welded at each intersection in its tight 1 ¼" x 2½" grid pattern, this system can be installed as close as 8” to hazard (per ISO 13857). This allows you to install much closer than the conventional 2" x 2" grid pattern, which cannot be installed closer than 33¼”. With this extra 25% in distance, you can more efficiently utilize your floor space.

With simple mounting clips, this frameless system is easily reconfigurable, flexible and installs 25% faster than substitutes by employing fewer parts and utilizing self-tapping screws.

**EASY TO INSTALL WITH CLIP AND TEK SCREWS**

A 6" x 6" footplate is available for areas that need extra support.
A FAST AND FLEXIBLE TWO-POINT FASTENING SYSTEM WITH QUICK ACCESS FOR MAINTENANCE

- **FAST INSTALL**
  With very few components, Drop-N-Lock® can be quickly and easily installed.

- **HASSELE-FREE REPAIR & MAINTENANCE**
  Drop-N-Lock® is easily dismounted with one tool, allowing quick access for repairs and maintenance.

- **IN STOCK**
  We keep a large stock of our standard components in-house to ensure quick shipping for your urgent safety needs.

- **MEETS SAFETY STANDARDS**
  The Drop-N-Lock® system meets all relevant OSHA, ANSI/RIA CSA and ISO safety standards.

Drop-N-Lock® provides versatility and ease for the installation and maintenance of Saf-T-Fence® Machine Guarding. This easy-to-use bracket system allows for quick configuration and removal, substantially saving on installation and maintenance costs. Offered in a wide array of panel sizes, door options and locking hardware, Drop-N-Lock® can cover nearly every requirement.

To install the Drop-N-Lock® Bracket System, simply drop the panels into the post brackets and lock it into place with simple tightening. When maintenance workers need access, you can quickly remove the panel from the posts and the bracket system will stay attached to prevent any misplaced hardware.

Our partitions and lockers secure valuables with minimal configuration in both industrial and commercial environments.
**KEEP YOUR INVENTORY SAFE WITH AN EASY-TO-ASSEMBLE PARTITIONING SYSTEM**

- **STRUCTURAL INTEGRITY**
  - Our framed welded mesh that bolts into our posts gives Saf-T-Fence® superior strength and stability.

- **MODULAR SYSTEM**
  - The Saf-T-Fence® system consists of standard panels available in a variety of widths and heights.

- **IN STOCK**
  - We keep a large stock of our standard components in-house to ensure quick shipping for your urgent security needs.

- **MULTIPLE LOCK OPTIONS**
  - With doors available in multiple configurations, we’re able to find the right solution for your project. If your required option doesn’t show here, your local sales representative will work with you to find the best solution.

You don’t have to build permanent walls to control access to your inventory, tools, supplies or documents – Saf-T-Fence® Partitions are a great, low-cost alternative! Our modular partitioning system provides security, structural strength and flexibility, all while allowing an unobstructed view of your property. The mesh pattern also allows for full air and light circulation with no change to your lighting or heating systems required.

Our modular system can be built in various heights by pairing our lighting or heating systems required.

**KEEP YOUR INVENTORY SAFE WITH AN EASY-TO-ASSEMBLE PARTITIONING SYSTEM**

- **Hinge Door with cylinder lock**
- **The angle panel kit can join two panels at any angle**
- **The sturdy 6” x 2” footplate makes the system extremely stable**
**GALVANIZED WIRE WELDED IN A GRID PATTERN CREATES AN ATTRACTION AND SECURE SYSTEM FOR SEPARATING SPACES**

- **UNSURPASSED ADJUSTABILITY**
  The Qwik-Fence® System can be easily adapted on-site to meet your specific needs.

- **IN STOCK**
  We keep a large stock of our standard components in-house to ensure quick shipping for your urgent security needs.

- **PRE-ENGINEERED ROOMS**
  Available in multiple configurations, the Qwik-Fence® system ships pre-packaged, making it quick to set up and easy to relocate.

Qwik-Fence® Welded Wire Partitions are an extremely tough and attractive system for separating and securing any space. Welded at each intersection – over 500 welds in a 4’ x 8’ panel – this wire mesh partition is substantially stronger than woven wire alternatives.

True to their name, Qwik-Fence® Partitions install 25% faster than substitutes by employing fewer parts and utilizing self-tapping screws. The partitions are easily reconfigurable, flexible and the galvanized finish will keep the system looking new for years to come.

Multiple locking options are available (cylinder lock shown).

All slide doors come with sturdy tracks.

DURABLE, TRADITIONAL AND COMPETITIVELY-PRICED FENCING FOR SEPARATING AND SECURING AREAS

- **PRE-DESIGNED ROOM KITS**
  Room kits are economical, easy to install and available in a variety of configurations—all of which include a sliding door.

- **MODULAR SYSTEM**
  The Wov-N-Wire® system consists of standard panels available in a variety of widths and heights.

- **TRADITIONAL**
  This is the option if you have an existing, older install that needs to be matched.

Wov-N-Wire® Partitions are the traditional enclosure system specified by architects and contractors. The 10-gauge steel wire is woven to create a durable, high-quality system that can be specified by architects and contractors. The partitions can be configured into a 2-, 3-, or 4-sided room.

The ability to be configured into a 2-, 3-, or 4-sided room, Wov-N-Wire® Partitions can be used for a variety of applications, such as enclosing work areas or creating secure storage cages and stock rooms. The rooms can also be configured to include a roof or a service window.

With the ability to be configured into a 2-, 3-, or 4-sided room, Wov-N-Wire® Partitions can be used for a variety of applications, such as enclosing work areas or creating secure storage cages and stock rooms. The rooms can also be configured to include a roof or a service window.

SLEEK CABINETS TO SECURE YOUR HIGH-VALUE PRODUCTS

- **STRUCTURAL INTEGRITY**
  - Framed welded mesh is used all around the cabinet and the corners are designed with a sturdy 2” × 2” tubing to provide excellent strength and stability.

- **OPTION TO SHIP PRE-ASSEMBLED**
  - When you order a pre-assembled cabinet all you have to do is bolt it to the floor!

- **COMES WITH TWO SHELF LEVELS**
  - Each shelf level can support up to 200 lbs. UDL and additional shelves can be easily added.

- **VISIBILITY**
  - Folding Guard’s mesh design allows for a quick visual inspection of valuable items. Standalone Stor-More® Loss Prevention Cabinets are designed to secure small- to medium-sized, high-value products in any location—on the sales floor, in the back room or in the receiving area. The open mesh design of the cabinet allows for a quick visual inspection of contents and does not obstruct sprinkler system performance.

Made from 10-gauge welded wire mesh panels on a 2” × 2” frame, constructed of 14-gauge tube, Stor-More® Loss Prevention Cabinets are extremely sturdy and durable. Hinged doors include a built-in cylinder lock and all lockers include two levels of shelves in 4-gauge welded wire. More shelves can be added depending on your needs.

INDIVIDUALLY-LOCKED
COMPARTMENTS FOR
SERVICE TEAM PICK-UPS
OR EMPLOYEE STORAGE

- **STRUCTURAL INTEGRITY**
  Our framed welded mesh is used all around the locker to provide exceptional strength and stability.

- **OPTION TO SHIP PRE-ASSEMBLED**
  When you order a pre-assembled cabinet all you have to do is bolt it to the floor!

- **MULTIPLE TIER OPTIONS AVAILABLE**
  With a variety of options available, you can choose the design that best fits your needs.

- **OPTIONAL BACK DOOR**
  Back door allows for fast and secure distribution of work orders for your dispatch team and employees.

Stor-More® Dispatcher Lockers feature individually-locked compartments, making them well-suited for a wide variety of operations. With the option to add a rear door, dispatcher lockers can be especially useful where service employees need to pick up daily work orders and equipment.

Available in almost every imaginable combination — single- to triple-tier, front-and-back doors and 90 different standard sizes — the Stor-More® Dispatcher Locker can be configured to meet your needs.

PREVENT OBJECTS FROM FALLING OFF OF OVERHEAD STORAGE SYSTEMS

- **LIGHTWEIGHT**
The frameless design makes our Qwik-Fence® Pallet Rack Backing lightweight and easy to install.

- **WELDED MESH**
Welded mesh provides a safer working environment than netting.

- **STACKABLE**
The sky is the limit! You can add panel after panel to achieve your required screen height.

- **IN STOCK**
We keep a large stock of the most common bay widths in-house to ensure quick shipping for your urgent needs.

The Qwik-Fence® Pallet Rack Backing System is designed to secure an existing pallet rack or bulk rack. This all-steel system provides great fall-down protection for all employees and visitors. The open mesh design allows for quick visual inspection and will not obstruct sprinkler system performance.

With multiple assembly options, the Qwik-Fence® system can be mounted flush or with a variety of stand-off brackets and is easily assembled with all hardware included. The galvanized finish will keep your system looking new for years to come.

Offset brackets are available in different distances. Adjustable extension kit allows you to extend panels past uprights.
Our storage lockers come in multiple sizes and configurations so you can store anything from military equipment to tenants’ personal belongings.
PREMIUM LOCKERS FOR SECURE STORAGE OF TENANTS’ PERSONAL ITEMS

EASY INSTALL
Component panels are pre-punched and slotted for easy assembly and relocation using standard hand tools. Units can either be bolted to the floor or to the wall.

FLEXIBLE CONFIGURATION
Lockers are available in single-, double- and triple-tier configurations, and can also be combined to fit your needs.

CAD SUPPORT
We can support you with CAD drawings to show how our lockers can be located within your space.

Stor-More® Framed Welded Wire Tenant Storage Lockers provide sturdy and secure storage with a sleek design. Their heavy-duty construction and powder coated finish ensure years of maintenance-free performance.

The modular design of these lockers, along with their pre-punched and slotted panels, allows for easy planning, installation and relocation. Available in six standard sizes ranging from 3’ x 3’ x 90” to 4’ x 5’ x 90”, Stor-More® Framed Welded Wire Tenant Storage Lockers can be configured to meet your unique needs.

**MADE IN THE USA**

- Galvanized Tenant Storage Lockers provide sturdy, secure storage for apartment, condominium and business tenants. Their galvanized finish and heavy-duty construction ensure years of maintenance-free performance.

- A modular design makes Stor-More® Galvanized Tenant Storage Lockers easy to plan, install and relocate. Available in six standard sizes ranging from 3’ × 2’ × 90” to 4’ × 5’ × 90”, our lockers can be configured to meet your unique needs.
PROTECT COMPRRESSED GAS CYLINDER TANKS FROM DAMAGE, THEFT & UNAUTHORIZED ACCESS

▶ GALVANIZED FINISH
The galvanized finish makes our Saf-T-Stor® Cylinder Cabinets suitable for any industrial environment.

▶ MULTIPLE SIZES AVAILABLE
With a wide variety of sizes, you can choose the Cylinder Cabinet that best fits your needs.

▶ EXCEEDS MARKET REQUIREMENTS
All Folding Guard Cylinder Cabinets exceed OSHA 1910.110 requirements and NFP standard 58-79.

▶ EASY ASSEMBLY
All components are slotted, making assembly quick and easy using only common hand tools.

Saf-T-Stor® Cylinder Cabinets provide compact storage for compressed gas cylinder tanks while protecting them from damage, theft and unauthorized access. You can rest assured that your tanks will be safe as our cabinets exceed OSHA 1910.110 requirements and NFP standard 58-79 and all purchases come with an OSHA-compliant “Danger Flammable Material” sign included.

Whether you need to store your tanks inside or outside, the galvanized finish of Saf-T-Stor® Cylinder Cabinets can withstand the elements while resisting rust and corrosion. With a wide variety of models—including horizontal, vertical and combination storage configurations—you can design a cabinet to fit your exact needs.
**SECURE STORAGE FOR MILITARY EQUIPMENT & GEAR**

- **STRUCTURAL INTEGRITY**
  Constructed of heavy-gauge steel, our TA-50 lockers can withstand years of heavy use.

- **MILITARY DESIGN**
  Meets U.S. Military requirements for securing personnel's equipment and gear.

- **VISIBILITY**
  Our mesh design allows for a quick visual inspection of content.

- **EASY ASSEMBLY**
  All hardware is included and all components are welded and pre-punched, making assembly quick and easy.

Our TA-50 Military Lockers provide secure storage of personnel equipment and gear. The open mesh design allows for both quick visual inspection and ventilation. Both models are constructed of heavy-gauge steel to withstand years of heavy use. Both models feature full-height doors with a three-point locking system and a built-in padlock hasp. With this system, the latching rod engages the top and bottom edges of the door frame, while a center latch engages the door jamb, enabling doors to latch on three sides. The key differences between these two models are the backing and door type—the Expanded Metal model offers a solid back panel and bi-parting hinge doors, while the Framed Welded Wire model has an open mesh back and a single hinged door.
