Electric Vehicle Charging Solutions

EV Ready Infrastructure

Future-proof Design - Install electrical equipment once and scale charging stations over time to avoid costly upgrades and permit fees down the line.

Dynamic Load Management - Greatly reduce installation costs by sharing the incremental circuit capacity of your electrical infrastructure.

Reduced Downtime - Limit construction activity, power disconnects, and parking restrictions.

Increase Property Value - Add value and appeal to your real estate without increasing property taxes or insurance premiums.

Charging Technology

Power Management - Automatic limits and custom scheduling lets you manage the inevitable spike in energy demands during peak times.

Secure Connectivity - LTE cellular network gateway; Zigbee local mesh communications; RFID card readers; WiFi repeaters/upgrades *not* required.

Advanced Software - Automatic firmware and App upgrades ensure the latest features and vehicle compatibility via the e-Charge Network.

Built to Last - Durable casing, premium cable management, and flexible mounting options engineered to operate from -40 °F to 122 °F.

Electric Vehicle Charging Solutions

Project Management

Site Analysis + Engineering Design - An assessment of your property is performed to provide a complete project design customized to fit your unique needs.

Comprehensive Proposal - The service proposal includes all up-front electrical and infrastructure costs as well as the a la carte price per parking spot.

Ordering, Scheduling, & Dispatching - All invoicing, product deliveries, installation scheduling, and dispatch coordination is handled by Nextech.

Incentives & Financing

Financing Options - Leverage affordable loan and credit products to reduce/eliminate up front payments and free up cash flow.

Incentive Programs - Many rebates, grants, and tax incentives are available to help reduce total project costs and maximize ROI.

Generate Revenue - Implement charging rates to offset electricity usage fees and cover expenses.

Administration & Billing

Administrative Portal - The management dashboard provides a snapshot of your current charging status, session history, billing and revenue reports, and energy consumption data.

Access Control - Authenticate drivers; assign, manage, and restrict access; create wait lists, permit charging times, and set energy consumption limits.

Remote Diagnostics - View your chargers' current status, restart and troubleshoot specific stations, and receive push notifications for maintenance or connectivity issues.

The Nextech Advantage

Warranty, Service, & Support – From online ordering and invoicing, to booking and dispatch, to technical support - we handle it all at every stage so that you can focus on what matters.

Compliance & Legal - We comply with all insurance and licensing requirements, local municipal codes, and facility rules & guidelines.

Single Point of Contact - Nextech's end-to-end project management and ongoing service and support simplifies your entire EV experience.
