SERVICE DEPARTMENT

24 Hour Emergency Service

Inspection, Testing and Maintenance

Corrosion Management

Inspections, Testing & Maintenance (I.T.M.):

- Service in conformance with NFPA 25; the national standard for Inspection, Testing and Maintenance of Water-Based Fire Protection Systems
- Trained, professional service personnel
- NICET Certified inspectors

Typical Inspections and Testing Offered:

- Automatic Sprinkler systems
- Standpipe systems
- Fire pumps
- Private fire service mains
- Water storage tanks
- Backflow prevention

Corrosion Management:

- Specialized corrosion management services geared toward prevention, testing and treatment of conditions within metallic piping as a key component of an integrated I.T.M. program.
- Adoption of a proactive corrosion management program will preempt the need for future pipe replacement and ensure the continued ability of your system to perform as originally designed.

Typical Services Offered:

- Corrosion Management Consulting
- Water Testing
- Pipe Sampling
- Pipe Scanning and Video Inspection Services
- Sprinkler System Flushing
- Corrosion Treatment
- Corrosion Monitoring
- Certified laboratory analysis

COMMERCIAL INDUSTRIAL

Commercial/Industrial Fire Protection:

- United States Alliance Fire Protection has the experience and expertise to assist our customers with any commercial or industrial fire protection challenge. No other fire sprinkler contractor can surpass our bonding capacity or insurance capability.
- United States Alliance Fire Protection's office and field personnel are an expert team that has delivered many high profile projects on time and on budget.
- Retrofit of existing highrises, hospitals and other complex structures has become a particular specialty.
- Extensive experience protecting our customer's lives and property throughout all types of construction. Specifically:
 - High rise (commercial and residential)
 - Health Care Facilities
 - Office occupancies
 - Retail buildings and complexes
 - Combined or Multi Use Occupancies
 - Storage facilities
 - Hotels and conference centers
 - Apartments
 - Educational facilities
 - Senior Housing
 - Manufacturing
 - Heavy Industrial
 - Unique applications

The logistical experience gained over many large projects combined with our solid financial strength instills the confidence our clients need to move forward.

RESIDENTIAL

Residential Fire Protection:

- The need for residential fire sprinklers has never been greater. Just the normal furniture, furnishings and other content people bring inside their homes represents sufficient fuel to achieve deadly flashover in minutes.
- In the past solid, sawn lumber and natural fibers dominated home construction and content. Today, the prevalence of engineered lumber products and synthetic materials yield a far more dangerous environment.
- United States Alliance Fire Protection has protected thousands of single family homes, townhomes and low-rise condominiums from these modern dangers since 1988.
- The National Fire Protection Association has recognized the unsurpassed lifesaving value of residential fire sprinklers with their recent Fire Sprinkler Initiative. For more information: www.firesprinklerinitiative.org.

Typical Services Offered:

- Free proposal with firm pricing
- Shop drawings and permits
- Coordinated installation, quality workmanship
- All tests and inspections necessary for occupancy
- One year warranty
